QUALITY PRIDE EXCELLENCE

BuckHorn Services and BuckHorn Rentals are here to provide you with unparalleled expertise in technical bolting, pressure testing, field machining, pipeline maintenance, valve repair services, and so much more for a truly seamless and reliable experience

INTRODUCTION TO BUCKHORN

Buckhorn Services started with very humble beginnings as a small rental company owned and operated by two good ole boys from the bayous of South Louisiana.

What started small soon grew into a multi-million-dollar business that now spans two states with locations in Houma, LA, Gonzales, LA, and Midland, TX.

Within Buckhorns' three locations, they have created multiple business units.

These business units are experienced in providing technical bolting, pressure testing, field machining, Hot Tapping, pipeline maintenance, and valve repair services in the Upstream, Midstream, and Downstream Markets.

Buckhorn can provide experienced professionals to manage your project from inception to commissioning, providing traceable data to meet any QA specification.

BUCKHORN SAFETY

Buckhorn has established a process for involving employees at all levels within the organization, measuring health, safety, and environmental (HSE) performance, reviewing issues, identifying improvement areas and best practices, managing incidents and their resulting actions, and communicating the effectiveness of the Health, Safety, and Environmental Management System.

Communication is critical to the overall success of our process, providing quality engineering and management practices and maintaining a safe working environment.

SKILLS AND KNOWLEDGE

Every Buckhorn employee undergoes extensive training in specialized areas, safety and accident prevention, followed by competency tests/operator qualification testing, to ensure that each new hire meets Buckhorn standards. Buckhorn employees specialize in Hydro and Pneumatic Testing, Double Block and Bleed Isolation and Localized Weld Testing, Field Machining, Flange Refacing, Line Boring/ Shaft Turning, Key Groove Cutting, Drilling and Tapping/ Stud Removal, Portable Milling, Hot Tapping/ Line Stop and Line Freezing, Metal Disintegration, Pipe Cutting and Beveling, Controlled Bolt Torquing and Tensioning, Millwright Services, Valve Repair and Preventative Maintenance, and Hydraulic Flushing.

BUCKHORN'S CORE VALUES FOR SERVICES AND RENTALS

Our core values are at the center of everything we do. Buckhorn is committed to conducting business with a high moral standard.

Each value is equally important to the success of the company. Safety and the protection of our most important asset – our employees are at the core of our beliefs.

THE FUTURE OF BUCKHORN

Buckhorn's goal moving forward is to create partnerships with all of our customers and contractors to pursue long-term projects and provide support, as well as grow our footprint in the Midland/Odessa area and beyond.

Buckhorn's pledge is to perform at a high level with efficiency and integrity. Buckhorn looks forward to exceeding your expectations soon!

INSPECTION IS ONLY HALF OF THE JOB

At Barracuda Specialty Services, we believe inspection is just the beginning. Our mission is to provide our clients with innovative inspection solutions while nurturing an environment that advocates safe, proficient, and virtuous performance.

This drives our commitment to delivering comprehensive, actionable solutions that go beyond simply identifying problems. We combine elite technical expertise with cutting-edge technology to support critical infrastructure, minimize downtime, and enhance operational safety.

WHAT WE DO

Non-Destructive Testing (NDT)

Our certified technicians utilize proven NDT methods to evaluate materials and structures without causing damage. From pipelines to pressure vessels, we deliver precise assessments that help clients maintain asset integrity, ensure regulatory compliance, and achieve operational excellence across demanding industries.

Advanced Inspection Services

Barracuda sets the standard for advanced inspection with state-of-the-art tools and deep technical expertise. Our advanced services include:

- **Phased Array Ultrasonic Testing (PAUT)** and **Time of Flight Diffraction (TOFD)** for high-precision flaw detection and sizing
- **Corrosion Mapping** to visualize wall loss and monitor asset health over time
- **3D Laser Scanning** for high-resolution spatial analysis and deformation monitoring
- **Eddy Current Applications** for surface and near-surface crack detection in conductive materials
- **Computed and Digital Radiography (CR/DR)** for detailed internal imaging with minimal exposure risk

Rope Access Services

We specialize in delivering safe, efficient solutions for hard-to-reach and high-risk environments. Our rope access capabilities include:

- **Rope Access Inspections**
- **Rope Access Maintenance**
- **API Visual Inspections** (internal and external)
- **Insulation and Painting**
- **Welding** (R-stamp certified)
- **Pipe Fitting**
- **Torquing of Piping and Equipment**
- **Ironwork**
- **Steam Leak Repairs**
- **Piping Demolition**
- **Electrical Services** (wire pulling and cable tray installation)
- **Bull Rigging** (handling all types of assets)
- **Sandblasting and Painting**

Our rope access teams are highly trained to perform inspection and maintenance work with minimal disruption and rapid setup, eliminating the need for scaffolding or heavy lift equipment. On average, rope access solutions deliver **cost savings of 40% to 80%** compared to traditional methods.

Why Barracuda?

At Barracuda, we don't just find problems—we solve them. From top-tier inspections to hands-on support, we're more than a service provider; we're your solutions partner. Whether it's a conventional inspection or a complex corrosion analysis, we have the experience, equipment, and expertise to get the job done right.

At BSS, we understand that your work is mission-critical. We proactively manage our operations and resources to ensure shared success. You can count on us to deliver the highest standards of quality, efficiency, and reliability, even on the most complex projects and most demanding production schedules.
